

# Data Management Working Group Annual Report

Jackie Bland  
Geotechnics Limited

# AGS4 4.0.4 Released

See final page of document for summary of changes:

- ‘Moisture content’ has been replaced with the term ‘Water content’ in accordance with BS EN ISO 17892-1:2014
- Headings marked for deletion:
  - PMTD\_SEQ ‘Pressuremeter Test Results – Individual Loops’
- Additional headings:
  - LOCA\_NATD ‘National datum’
  - LOCA\_ORID, LOCA\_ORJO, LOCA\_ORCO ‘Archive tags’
  - SAMP\_RECL ‘Length of sample recovered’ (not percentage)
  - RDEN\_IDEN ‘Intact Dry Density’
  - GCHM\_DLM, GCHM\_RTXT ‘Detection limit and Reported value’
- Data type changes  
e.g. LVAN\_VNPK changed from ODP to XN to allow text values such as ‘>140’

# New Initiatives

- Piling (AGSC) – construction related tables, initially
- Grouting
- Advanced Testing
  - Effective Stress, cyclic triaxials, thermal conductivity, wireline logging
- New website
  - Currently under development
  - To be launched end of May 2017

# Company Registration of Use of Data Format

1991	£20
1992	£40
2017	£150
2019+	Annual charge: £150 non-members £ 75 members

# The Geotechnical Data Conference 2017

*'Best practice, challenges and future opportunities'*

20<sup>th</sup> September 2017

Motorcycle Museum, Birmingham

This conference focuses on the role of geotechnical and geoenvironmental data management within the wider context of digital engineering and BIM.
